

Responsible Mineral Sourcing Statement

Olympic Engineering Service, as a privately held company, is not subject to the Conflict Minerals reporting requirements, however, we understand that many of our Customers are. Therefore, Olympic Engineering Service has committed to purchasing from Suppliers utilizing responsible in-region sourcing of Tantalum (Ta), Tin (Sn), Tungsten (W) and Gold (Au), and we have asked our suppliers to join us in this commitment.

We have sent a Conflict Minerals Reporting Template (CMRT) survey to all our suppliers to ascertain their use of Conflict Minerals in the materials they supply to us. To the best of our knowledge and based upon responses received, our products do not contain Conflict Minerals that were mined or smelted in the Democratic Republic of the Congo (DRC) or adjoining countries. Olympic Engineering Service will update our CMRT as we receive yearly responses from our approved supplier base.
